## Local and General

Mr. and Mrs. J. Magnusson of  
Lomond, spent the week end at  
the home of L. Granlin.

Mrs. G. M. Campbell entered  
at dinner on Sunday when her guests included Dr.  
and Mrs. Freeze.

R. M. Long, who has been a  
visitor here for a few days, left  
for Calgary Tuesday.

J. Kulpas and W. Melanis  
left Tuesday by truck to seek  
their fortunes in the Caribbean  
country in British Columbia.

Chase and Sanborn's Coffee,  
Special Blend, 3 lb. tins for \$1  
at Campbell's.

Alex Goetz was a Calgary  
visitor over the week end.

Order Now! Cabbage, Cauli-  
flower, Tomato, Bedding plants  
at Campbell's.

Mr. and Mrs. Sandy Watt of  
Brant, were Champion visitors  
Sunday.

J. Ashmore and H. Bestor  
have taken up residence in the  
house owned by Mrs. Williamson  
near the Farmers Restaurant.

Miss Marion Lebow of Vul-  
can, was a guest at the teacher-  
age for a few days last week.

Mrs. R. I. Baker is spending  
a few days in Calgary.

Mrs. A. McCullough spent  
Mother's Day in Calgary.

Miss Cook, Miss Cameron and  
Miss Clarkson were weekend  
visitors at the home of Mr. and  
Mrs. LeBow of Vulcan.

Mr. and Mrs. H. T. Lamont  
were visitors in Calgary this  
week.

Lovely Flowers, ready to  
bloom. Pansies, Aster, Petunias,  
Marigolds etc. See them  
at Campbell's.

Mrs. Harry Smith and Marvin  
expect to leave shortly for Tor-  
onto, where Mrs. Smith will  
spend a month visiting at the  
home of her mother.

Found—Hub cap for Dodge  
car. Owner apply at Chronicle  
office.

HERBERT J. MABER  
SOLICITOR, BARRISTER, NOTARY  
VULCAN  
At U. S. Alexander's office  
every Thursday

K. R. McLean, R.O., of McLean  
& Anderson, Sight Specialist of  
224-8th Ave West, Calgary, will  
make his monthly visit to  
Champion, Friday, May 26th  
at the Drug Store.

## WARNING!

Any motorist caught speeding  
by the Champion Consolidated  
school premises at dismissal  
hours will be reported to the  
police officer. Kindly take  
notice.

Signed  
R. I. BAKER, Principal

Champion United Church  
Rev. Peter Dawson, Minister  
Sunday, May 21

Blissoun Morning Worship, 11:30  
a.m.

Yellowwood Divine Service, 3:30 p.m.

Champion Sunday School, 11:00 a.m.

Champion Evening Worship at 7:30

Subject—"Rural Life Sunday,"  
Speaker Rev. A. Ramie B.A. of High  
River.

Special music by choir.

## May Meeting

### Women's Institute

The May meeting of the  
Champion Women's Institute,  
in charge of the chairman of  
Child Welfare and Public  
Health, and Education and  
Better Schools, was for the  
"Pre-school Child" and in spite  
of the rain and mud, over  
thirty members and guests  
assembled in the United church  
to enjoy the program and to  
hear the public health nurse  
from High River Okotoks, Miss  
Jones, talk on the Health Unit  
she represents, and give some  
excellent advice about the care,  
food and training of the young  
child.

The walls of the room were  
covered with Health Posters,  
lent by the Thigh Hill school,  
and there was a very interesting  
and attractive display of Nursery books  
and some lovely flowers.

Three very young ladies,  
Misses Phyllis and Betty Ash-  
more and Carol Baker sang.  
Miss Campbell told a thrilling  
story. Mrs. McLean sang in  
her usual very acceptable man-  
ner and altogether the program  
was fine. We were sorry that  
Mavis Moffatt, was unable to be  
present to sing, she was sick.

A special meeting is to be  
held May 30th, at Mrs. Mc-  
Lean's home, when the new  
Constituency convenor is to  
come to address us.

The June 13th regular meet-  
ing is to be very special. Mrs.  
Ulrich is in charge of the pro-  
gram. It will deal with Alberta  
Products, and a government  
speaker with Lantern Slides is  
coming. Several of the neighbor-  
ing branches are present.

This meeting will be held in  
the Union Hall.

Mrs. Farries and Mrs. Cham-  
berlin served a very delicious  
lunch at the meeting described  
in paragraphs 1, 2 and 3. The  
sun came out and we all went  
home happy.

Mr. and Mrs. C. W. Marcellus  
of Calgary have taken up resi-  
dence in Granlin's house across  
the street from the Garage.  
Mr. Marcellus, late of the Chev-  
rolet Motors Calgary, is a me-  
chanic of wide experience and  
has charge of the mechanical  
department of Granlin Motors.

Two interesting games of  
soft ball were played at Fire-  
guard on Sunday when Champion  
met Hiawatha and Alton.  
The score in the first fixture  
was Champion 17, Hiawatha 6.  
In the second, Champion 23,  
Alton 5. A good crowd wit-  
nessed the games which proved  
highly enjoyable.

Barbara, Joan and Philip  
Bastin were among the eight-  
een who were confirmed at the  
Confirmation service held on  
Wednesday evening at the  
Anglican Church, Carmagway.  
Following the service, a reception  
was held at the home of Mr.  
and Mrs. Hugh Parker, at  
which Bishop and Mrs. Sher-  
man of Calgary were present.

It is expected that the Chi-  
cago fair will increase tourist  
traffic to Alberta as so many  
California motorists driving to  
the fair in Chicago plan either  
to go or return by one of the  
Canadian routes.

The small son of Mr. and Mrs.  
R. D. Farries received the name  
of "Robert Edgar" at the Chris-  
tening service, held on Sunday  
evening in the United church.

We have an order for Dry  
Hides and we will pay Cash.

Hides and we will pay Cash.

## Domestic Work On Farms

Many Girls Might Find It Better Than Idleness In City

Farm girls in the United States are positive, offered in good home to young women who will do household work with comparatively few tasks. In days gone by, the accepted idea was that a nation was educated as a nurse or a "bedding shop girl"; frequently spoken of with disapprovement. The duties of the household were performed in the main by members of the family, while domestic service was limited to one or two months. Then factory unemployment became quite the usual thing, followed by positions as stenographers and bookkeepers, and more recently as nurses and secretaries in business and medical professions. The latest scheme sought to be opened to educated young women is ordination to the ministry of one of the Christian bodies. All this has been followed by crowding for positions in government, sufficient to numerous to meet the demands with thousands of cultured young people on relief here and in the United States, and with no prospect that the near future will bring employment for many to fill such duties. On the other hand, "girls in the country" attract employment in good homes with sufficient remuneration to provide clothing and sufficient recreation not to be considered a burden. Better would be to live in the side towns and city girls in the beautiful surroundings of a farm home than the existence many are eking out while hoping that a position in an office will come their way. Our Women's Institutes are giving much help in improving conditions for farm life, and can add to what they have accomplished by showing to young women that domestic service is neither degrading nor derogatory, and that the need here and there is great and home on the farm about, not be discarded for a prospective pile in overcrowded professions in towns and cities.

### Good Old English Word

"Whoopie" Was Rallying Cry In London Four Centuries Ago

When your children say they are going to "make whoopie," you probably answer peevishly, "Must you always be peevish?" But "whoopie" is an American slang word. It is a good old English word. Four hundred years ago it was the rallying cry of the London apprentices, when, after a gay evening, they ran riot in the streets, shouting it, and were made miserable for the rest of the day. Some dramatists used the word. One play, the Virgin Martyr, written in Shakespeare's day, contained the line "Nay, lady, for to think that I'll cry 'Whoopie'." Just how the word got to America is not known. At any rate, it was used again in the Wild West where cowboys shouted "Whoopie!" when they were rounding up their cattle. Its use spread to other inhabitants of the West. Circus people heard the expression and used it to promote their shows. They used it to make a cry, but when New York people heard them calling it they changed it to "make whoopee" and used it as a term meaning to enjoy oneself notably. It reached the theatre world. The term of talkers reached in this good old English word began to be heard again, and coming back to our vocabulary. But it has lost its former meaning, for authorities say that the word cannot be used for a bachelorette party. It can only describe a party at which both sexes are present.

### Too No Chances

Motorist (to inkeeper, who has charged an exorbitant price for staying in car): "But my good man, that's not the case, some mistake. What's this \$6.00?"

Inkeeper: "Well, you see, sir, not 'aving a sit motor stop here above, I didn't know exactly what to charge. But you was saying it was a 40 horsepower, and I allow charges 2s per night for a horse."

### Lost In History

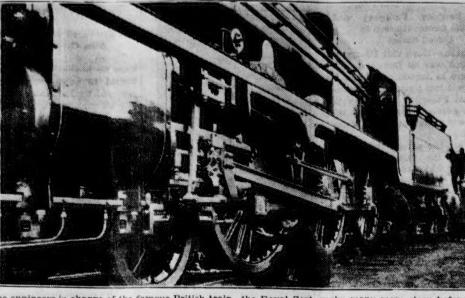

In the figures of registered deaths in Canada from tuberculosis as far in 1933, there is no evidence of any increase in the last half dozen years. Dr. E. Macpherson, Ottawa, medical secretary of the Canadian Tuberculosis Society, said in Toronto. The death rate for the Dominion last year, he said, was lowest in history.

### Lombardy Poplar Grows Quickly

Where a quick-growing windbreak is required the Lombardy poplar is one of the best trees to plant. It is very useful for hiding, in a short time, unsightly buildings and vacant lots.

W. N. U. 1934

## SOUVENIR HUNTERS PLAY HAVOC WITH FAMOUS BRITISH TRAIN

In the picture, in charge of the famous British train, the Royal Scot, is shown the damage caused by souvenir hunters. The engine is covered with debris and paint. Several people are standing around it, some appearing to be working on it. The scene is outdoors, likely at an exhibition or fair.

### Value Of Canadian Salmon

Research Shows Fish Very Rich In Necessary Vitamins

Canadian salmon are delicious and nourishing, and there are several reasons why they make excellent food, and that is because their body oil is rich in vitamins essential to health.

Vitamin "A" and Vitamin "D" both occur in salmon oil and the presence of Vitamin "D" is especially important since this vitamin is so valuable an agent in preventing and curing such ills as rickets.

Recent research has indicated that salmon oil is similar to recognized medicinal fish oils in vitamin content. The oil is mixed through the flesh of the fish, and is not found on the bone. In addition, it is very high in Vitamin "A" content, but low in Vitamin "D." Certain fish liver oils, on the other hand, are also very rich in vitamins and hence their value.

The particular salmon research in question here was not conducted in Canada but the oil samples used were from salmon of the same varieties as occur in British Columbia waters when the oil is of high quality.

At present times, research is being done to determine the nutritive value of salmon as being far into maturity. Professor L. E. Thorndike has long been telling us that we are never too old to learn. He has made a study, for new experiences is an indication of growth. He has not yet taken command of the mind. If one has within him a sufficiently fine quality of imagination, he need not look outside himself for the fountain of youth.—New York Times.

To make the test still more conclusive, move the paper quickly to about nine inches from the eyes. If you can still read it, there's absolutely nothing wrong with your vision.

Bacon Wilhelm Eder von Schenck, German ambassador in Paris at the time of the declaration of the great war, died from heart disease at the age of 87.

The consumption of butter in Canada amounts to about 30 pounds per head per annum.

Automobile taxes in Germany are to be reduced.

### Ideal Range For Chicks

Place Where Succulent Green Feed And Shade Are Available

The range for chicks is a clean, soft bed of straw, laid on an orchard, where they can get all the succulent green feed they can eat and still have shade as required. Given those conditions, once the chicks go outside, they can be reared with very little labor, confinement being placed mainly on proper feeding. For a satisfactory range hopper and other constructions for poultry have been evolved by the Dominion Department of Agriculture.

Vocalist: "I'm going away to study singing in Europe."

Friends: "Good! How far away?"

A reputation for absolute honesty has pulled thousands of men through tough spots in life.

## A Sharing Of Troubles

Harmony Between Employer and Employee During Difficult Times

One of the difficulties that has developed during this period of depression has been the spirit of responsibility and sacrifice jointly shared by the employers and the employees.

The employer has seen profits vanish and losses increase and the number of dividends become a memory.

The employee has had short time and in some cases reduced hour rates. But with all this there has been friction and no animosity.

The employer has been aware of his employer's difficulties than he did previously. He has known by his own sight and reason that reductions were not put in effect except as a last resort and that the employer and the employee would have been much better off had he made those reductions a year or more earlier than he did.

This harmony between employer

## Gardening Notes

By Gordon Lindsey Smith

Seeding flowers and vegetables in the hot bed or in flats in a sunny window will be requiring some attention. After the second set of leaves have been cut, the plants should be thinned out so that they have at least half an inch space each way. The soil between should be stirred a little and, of course, regularly watered. On warm days, water by lifting the window frame and allowing the water to run out in the bottom. This will keep the plants in the heat.

The plants have been growing in the garden since the time of his employer's difficulties than he did previously. He has known by his own sight and reason that reductions were not put in effect except as a last resort and that the employer and the employee would have been much better off had he made those reductions a year or more earlier than he did.

This harmony between employer

and employee has been one of the few bright spots that has prevailed in the general condition of affairs of the past two or three years.—Graphic Arts Bulletin.

### The Benefit Of Laughter

Good Antidote For Many Misfortunes

#### In Life

There is apparently, a standing alternative between annoyance and amusement over life's ironical accidents. He who gives his best is he who gets his best. The number of joys and ponders they are, the number of gales of British Columbia have prompted him to assist authorities in ridding the interior of both scourges, according to Rev. A. R. Lett, of St. George's Episcopal Church at Lytton, he said.

Because of the constant rain, there is wealth in poisons and dugs, there is today a surplus of the amazons in interior British Columbia, Mr. Lett stated. They are destroying sheep and poultry, and are of no value. Fortunately the modern Indian sees this, and is helping to rid the reserves of dogs and the ranges of wild horses, he said.

### The Fountain Of Youth

No One Needs Anything Better Than "Quality Of Imagination"

The right kind of education, there is a surplus of the amazons in interior British Columbia, Mr. Lett said. They are destroying sheep and poultry, and are of no value. Fortunately the modern Indian sees this, and is helping to rid the reserves of dogs and the ranges of wild horses, he said.

### Moscow Stages Demonstration

Russia's Military Power Pussed In Review Before Million People

On May Day in Moscow a million persons swarmed through the famous Red Square, saw the demonstration of Russia's military power. According to the Associated Press correspondent, between 35,000 and 50,000 troops of the Moscow garrison passed in review, with their armored car, artillery, anti-aircraft guns, tanks, mortars, machine guns, and tanks.

More than 1,000,000 spectators, including three-inch guns in their cartridge boxes, were gathered in the square to witness the latest in military equipment, while 350 airplanes overhead roared over the city.

Lady (engaging new maid): "And what denomination are you?"

Maid: "Well, mam, mother goes to the Baptist church and father to the Methodist, but speaking for myself, I'm wireless."

Soviet Russia today is not merely one of the world's greatest military powers. It is one of the world's greatest military dictatorships.

### Robber Bees Active

Will Overpower Weak Colonies And Carry Honey Away

Although honey stealing is likely to be most troublesome in late summer, the beekeeper has to bear in mind that robber bees may start their raids at any time. In warm weather when there is little or no honey to be got from the flowers, the bees will easily yield to any temptation to obtain it, anywhere, before less fierce fighting they will overpower any weak colonies, and carry the honey to their own hives. Old robber bees have a shiny appearance, the hair having been worn off with entering so many different hives. No colony should be allowed to grow weak, says the Dominion Apiculturist, and no honey or syrup should be exposed in the apiary.

### Loss Written Off

That pension was paid in error to a woman whose death had not been disclosed in London by the post office department. The woman, an employee, retired in November, 1883, on account of ill health, but failed to disclose that she was married at that time. Neither was it revealed until after her death in February, 1931. The loss has been written off.

The Library of Congress is the largest in the world.

**Window Boxes:**—It is now time to think about the window boxes which can be set out after danger of frost is over. One must remember that a window box is simply a trough or a form of garden, producing about ten times the amount of growth for the same area in the ordinary garden. On account of this it is essential that the soil used in the box be very rich, well-drained, and free from stones, and that it keep damp by daily irrigations. As they are exposed to the sun and wind on nearly all sides evaporation is very rapid, hence artificial moisture every day is imperative.

Window boxes should be as long as possible, and eight inches wide at the top, six at the bottom, and at least seven inches deep, all inside measurements. Reinforce corners on the inside with iron straps and make sure the window box is strongly attached to the window frame. It is usually stained or browned and may be painted to match the other wood work. Hold it firmly in the bottom and also a thin layer of broken crockery or cinders to provide drainage. If possible, put it on a layer of well-rotted manure, and cover with rich soil. Plant training vines such as nasturtium and German Ivy along the front and also edging material, with geraniums and larger plants at the back. Protect from sun and wind with newspaper for a few days after planting it in the ground.

**Shade-Loving Flowers:**—It is often considered quite a difficult problem to brighten up shady corners, particularly in these smaller gardens where all corners come in this category. But this should not cause any trouble because there are actually some plants which will grow in almost any kind of conditions. The tuberous rooted begonias, for instance, will not do well unless they are grown in shady corners, such as under tree foliage. These are easily propagated and recommended for partial shade. The verbena, phlox, nicotiana, pansy, marigold, petunia, nemophila, lupine, larkspur, godetia, Clarkia, Alyssum and Candytuft. Practically all annuals will hold their color longer and also their fragrance if they have a little light shade, particularly around noon hour when the sun's rays are strongest.

**World's Leading Newspaper**

**Medal Of Honor Has Been Given To**

**The London Times**—It was called the "leading newspaper of the world" by President Walter Williams of the University of Missouri School of Journalism. A medal of honor for "distinguished service in journalism" was awarded on behalf of The Times by Sir William Lewis, its Washington correspondent.

He referred to the newspaper's "impartiality, its learning, its courage, and its incorruptible English honor."

French vermouths and fruit juices for wine making cannot be shipped to the United States yet, even though they contain no more than 3.2 per cent alcohol.

## FANCIFUL FABLES

The Library of Congress is the largest in the world.

# Many Theories Advanced As To Why Sun Has Been Darkened Without Being Eclipsed By Moon

It is interesting to recall that the sun has sometimes been darkened without having been eclipsed by the moon, says Prof. T. B. Bits.

Through records of the first year of the reign of Augustus the light of the sun became so faint that it could be looked at with the naked eye. Here again, sunspots have been advanced as the cause, but it is extremely unlikely that they could in this instance, account for sun interference with the light. Even the largest naked eye spots, it will be found, cause no dimness.

Still more mysterious is what the asterisk notes, namely, that the sun had for some time sent a reddish light that the stars shone out at noon. The reddish light may possibly have been caused by the presence of atmospheric dust, but the circumstances of the stars shining at midday is puzzling, in the absence of any mention of an eclipse.

Kepler thought that some dense cometary matter must have caused the red glow, but he was disappointed over the sun at his last return in 1610, nothing of it was visible on that body, nor was there the least fading of the light.

There have been in more modern times remarkable sunsets at periods when the sky was apparently quite clear. To all appearances, indeed, there was no reason why the sun should not have shone with undiminished splendor.

On the continent, in regard to these cases, that a very fine volcanic dust may have been suspended at a great height in the atmosphere, as it was after the terrible eruption of 1783, and the world-shaking outburst of Krakatoa in 1883. In the latter case the sun can be seen to have been more or less veiled except, whilst during the lunar eclipse of October, 1884, the moon practically disappeared from view. As a rule it has a coppered color, mostly totally immersed in the earth's shadow.

While not favoring the idea of the passage of dense swarms of meteors partially cutting off the sun's light, it is not impossible that enormous flocks of birds might do something towards bringing that about.

But that as it may be, one is loth to believe that any real change takes place in the sun itself, such as can be observed in many of the infinitely more distant stars.

Nor is it to be supposed that there is involved anything which goes outside the recognized power or laws of Nature; anything, in short, which is supernatural.

## Preparing For Honey Flow

**Manitoba and Saskatchewan Order Package Bees From South**

Two keepers from the Steinback district recently made the long trip to Maytag, Missouri in a truck to secure packages of bees for themselves and neighbors. They are bringing back 300 packages or about 2,000,000 bees in time to stock up hives in Manitoba in preparation for the coming season.

Last year the Saskatchewan Beekeepers' Association sold 1,700 packages but this spring orders for more than 1,700 packages have been placed and the shipping season has hardly come. The bees will be imported from California, where the weather may enable them to have a head start. Previously most orders received were for two or three packages, and few more than twenty-five. This year there is a surprising number of orders for twenty-five, fifty, seventy-five, and one hundred or more packages.

## The Utility Of Garnet

**Has Its Place In Assisting Farmers In Certain Districts**

Should we consider the present experiments of the Dominion Department of Agriculture in combining the outstanding qualities of Reward and Garnet wheat, says Mr. Newman, the Dominion Cerealist, it would be difficult to conceive of much an accomplishment to Canada. Although Garnet is not considered quite the equal of Marquis from the point of quality, many farmers report that Garnet is enabling them to carry on work which might otherwise have had to give up. Garnet, however, is not recommended for any district where either Marquis or Reward thrives satisfactorily.

Air mail service across the Sahara desert is to be started shortly.

W. N. U. 1594

## Volume Of Trade Persists

**Buying Power Of People Is On Puzzling Feature Of Present Business Situation**

While there is a great lack of money in circulation the volume of trade in farm products does not appear to be checked. The opening of navigation at Montreal was marked by a quick jump in export sales of wheat, while wheat prices were falling. Figures furnished by Hon. T. L. Kennedy, Minister of Agriculture for Ontario, show that in March of this year, \$56,000,000 more produce was sold by farmers of the province than in the month of March of 1932. This is the second consecutive year in which a number of years that such an advance over a previous year has been recorded.

Mr. Kennedy also points to the exports of farm products to the United Kingdom which for the 12-month period ending January 31, 1933, had gained on various products ranging from 12 per cent. on canned fruits to 186 per cent. on bacon and ham and 232 per cent. on fresh pork.

The buying power of the people of the United Kingdom is one of the puzzling features of the present trade situation.

The same applies to Canada, which where there is a good deal of uncertainty as to the effect of the new duties in the form of Louisianas strawberries are being sold in quantities and a half carloads have been received in Montreal in one day.

## Shearing Without Shears

**Soviet Scientist Gets Remarkable Result From Experiment On Sheep**

Sheep which need no shearing, and living rabbits, cats and dogs with fur dyed in green, yellow and blue are the results of eight years of experiments by a young Soviet scientist. The scientist, Professor Illin, treated a flock of 2,500 sheep with chemicals. The results, the days later, says the Tass Agency, are beyond belief. Illin took between three and seven minutes to remove all the wool from each sheep compared with an average of forty minutes for shearing. The article continues: "The results of the experiments for the stimulation of the growth of hair have been conducted along two lines by the use of chemicals. By use of infrared and ultra-violet rays, rabbits are reported to have yielded nearly twice as much down and fur after treatment as before. The results of the treatment of the animals, however, is equivalent to that of the stimulation of sheep's wool can be achieved by the combined use of chemicals and rays. Rabbits, cats and dogs, whose white fur is calved by infrared rays, are parallel to the hair of the animal, thereby being easily sheared."

The buying power of the people of the United Kingdom is one of the puzzling features of the present trade situation. The same applies to Canada, which where there is a good deal of uncertainty as to the effect of the new duties in the form of Louisianas strawberries are being sold in quantities and a half carloads have been received in Montreal in one day.

## What One Acre Produced

**English School Teacher Had Remarkable Results From Small Allotment**

A teacher in a school in the South of England had such an allotment of acre. He grew vegetables, fruit, and even flowers, and turned his garden into a paradise.

He turned his garden into a paradise.

The International Way

The more extensively a person reads apparently authoritative articles and books dealing with present day economics; the more intently he studies, investigates, and seriously ponders over political, economic and social problems with an open and discerning mind, the more such a person becomes convinced there is, after all, only one way by which solutions for existing problems and difficulties can be reached...and that is the international way.

Consider the Canadian position as an example, and the situation in this country is in most respects similar to that existing in other countries throughout the world.

This Dominion is a land of great natural wealth; they are more intelligent, progressive, and anxious to work. They have the highest standards of living in the past, and desire to continue. They understand political and religious freedom, and have maintained and maintained social welfare, to the benefit, not only of individuals but for whole communities and the nation.

Nevertheless, at the moment, the development of natural resources of Canada, our greatest reservoirs of potential wealth, is at a standstill. Hundreds of thousands of men are unemployed and apprenticeship training is at a standstill. The population are subduing on a relief provided by the state. The standard of living is failing, not rising; social services are being abolished or curtailed; the burden of public debt is growing every day, and heavier; and even heavier taxes are being imposed.

What is wrong? Is Canada, and the Canadian people, alone to blame? Are they even chiefly blame? Are our politicians, Governmental, provincial, Municipal, Legislator, Ministers, Comptrollers, our bankers and financiers, our captains of industry, and transportation; our leaders in commerce and business, and agriculture, our leaders in church and education...are these chiefly responsible? Is it the system in vogue in Canada under which all our life and activities and institutions have been operated and governed in the past, and under which great progress was made, responsible for the present breakdown?

Some short-sighted people will thoughtlessly say "Yes," and will try to convince others that the whole trouble lies in the system and that Canada, if they will, can solve their own problems by their own action; that all they have to do is to change the present system, and create a new one based on an entirely different set of principles. And the same thing is being said in other countries.

There, however, is a superficial view. Suppose Canada could conquer, create within its own borders an absolutely ideal 100% perfect monetary, banking and credit system while other nations adhered to their present systems and methods, would that solve Canada's problems? Intelligent men and women realize it would not.

But suppose we, as a nation, adopted free trade with the world, in an endeavor to唤起 a revision in the exchange of commodities and currency system in motion all the great activity bound up in trade and commerce, while other nations adhered to their present policies, would not Canada's unemployed to work and revive Canada's Agriculture? Again, the answer is must decidedly "No."

The solution to our present economic problems is not to be found in a complete change in the system now prevailing in Canada—that would merely result in still greater unsettlement, in confusion ending in chaos, and more widespread loss and suffering—but it is to be found in international action. It is only then it can be found.

But what Canada and the Canadian people can do, and ought to do, is to encourage such international co-operation and to do, to encourage such international conditions and ideas in the minds of the people of other nations that will make such international co-operation and action possible. This Dominion can show to the world that it is ready and eager to join hands with any other nation, or any group of nations, in the task of breaking down narrow nationalistic ideas, and that it can, and will, succeed in doing so.

Every opportunity to promote international understanding and friendliness should be taken there—no matter how small it may be, should be quickly grasped, and Canada should indicate, without reserve, that it is prepared to go a long way in the direction of meeting other nations and peoples in providing needed solutions to existing problems.

Organized labor has the germ of wisdom in its international labor brotherhoods, and organized labor, but unfortunately, even within those brotherhoods a selfish nationalism existed, with the result that organized labor in one country proceeded to support selfish trade policies designed to protect themselves but to do injury to their fellow workers in another country. The folly of this has been brought home to them in these years of depression, and it is now evident that the bankers and industrialists in all countries, narrow nationalistic, simply wrong. That is what is fundamentally wrong with the prevailing system—the attempt of each nation to shut itself up in a watertight compartment away from all other nations, and in so doing is slowly but surely starving itself to death.

The testing down that is necessary, is the tearing down of the whole network of wise entanglements and barriers of one kind and another that the nations have erected against each other; the destruction that is called for is the destruction of the narrow nationalistic ideas and fears of people. Let the nations get off the by-paths of narrow nationalism and on to the broad international highway of the world, and the depression will pass like a mist before the rising sun; until then, give place to industrial and business expansion, especially with the works of one nation not beginning to work to other nations provided they are busy at work themselves, as they would be; and the primary producers on farms, in forests, fisheries and mines will again enjoy adequate markets and remunerative prices for their produce.

The international way is the world's highway; the international method is the Twentieth Century Method.

The United States is the largest consumer of asbestos in the world.

Java has an extensive back-to-the-homeland advertising movement.

### Pains Around Her Heart Tired Out After Doing Housework

Mrs. Henry Ranch, Muriel Lake, Alta., writes: "Last fall I had bad pains around my heart, and when I was after doing housework, I seemed to get very tired and feel all tired out."

Seeing that Milburn's Heart and Nerve Pills were good for those troubles I sent for some, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no trouble of the sharp pains and pains around the heart."

For pain at all drug and general stores; get up only by The T. Milburn Co., Ltd.

England has 3,500,000 dogs, according to a recent census.

Australia has banned all cigarette advertising.

### Needle and Pin Industry

Little English Town Supplies Practically All World Requirements

At a recent banquet of the Needle-makers' Company the Master stated that last year Great Britain manufactured 1,000,000,000 needles. Most of them were made at Redditch, in Worcestershire. Nearly all the needles, all the pins and all the fish-hooks in the world are made at Redditch. Nearly everybody in Redditch is employed making needles, pins and fish-hooks, and their ancestors have done so for hundreds of years. The Redditch factories are the most efficient in the world and are in an impregnable position.

If they turn out 750,000,000 needles a year, that means that in two and one-half years they make enough needles to give one to every human being on earth. Query: where do the billions of discarded needles go? The disposal of used needles makes a difficult problem. What about needles and pins? They must be put somewhere else there would be no demand for hundreds of millions of new ones each year. In fifty years Redditch must produce enough needles and pins to supply the entire world, and when all the sources even a needle or a pin lying around. In fact a pin seems about the scarcest thing imaginable sometimes when it is badly wanted.

Needles, pins and fish-hooks are just as much a part of the manufacture that Great Britain stands supreme in the world. There are hundreds of others.—*St. Thomas Times-Journal*

### Worked for Progression

Mrs. Mary Ellen Smith Was One Of Canada's Outstanding Women

Usefulness—this is the term and with an emphatic ring to it, to be applied in contemplating the career of Mrs. Mary Ellen Smith, who died recently in Vancouver, at the age of 72 years. Mrs. Smith, the first woman Cabinet Minister in the British Empire and for 10 years a member of the B.C. Legislature, was useful to her adopted province and to Canada and the world. She was ever a champion of many causes. Her interests, her contacts, were many; but every one of them counted for something. Mrs. Smith was a worker for the good and the progressive in life. She was a leader in the world's suffrage movement in Canada, and in the women's suffrage movement in China. In the Legislature and out she championed the cause of women and children, with minimum wage legislation, better working conditions, in factories and ship yards, and she was a determined advocate of industrial and educational movements, particularly of the miners. Water sprayers are fitted that every space, concealed or otherwise, can be bombarded with spray under pressure. She was a champion of the cause of oil workers, and she helped to turn the tide of the oil strike up into a multitude of oil globules, each surrounded by a thin film of water. This emulsion, as it is called by chemists, will not burn, since the flame only reaches the outer film surrounding the oil globules. The surface of the liquid being the non-inflammable, the fire at once goes out.

Mrs. Mary Ellen Smith, whose husband, before her, left his mark upon Canadian life as a member of the House of Commons and later as Minister of Finance in British Columbia, was one of Canada's outstanding women.—*Regina (Evening) Leader-Post*

### Seal Herd Going North

Excited By Canadian and U.S. Experts To Prevent Foraging

On their way north to breeding grounds on the Phylior Islands, Alaska, huge herds of approximately 1,000 caribou have been sighted off the West Coast of Canada. They followed to the international line and United States patrol cruisers and at that point Canadian vessels take over their assignment. At the Alaska line the American vessels withdraw and the United States cutters resume the journey.

The project is in line with that operating in Manitoba, Alberta and British Columbia where deductions to cover administrative cost are to be made.

**Death Penalty For Theft**

Soviet Authorities Make Death Sentence For Robbers

Some 200,000 robbers have

ordered death penalties to prevent theft or diversion of seed grain held by the central government.

Death was made the penalty not alone for the thieves themselves, but also for those whose negligence made the theft possible.

The Moscow press attributed grain thefts to sabotage by kulaks.

Umbrellas are to be supplied free of charge to patients of a movie theater in Madrid, Spain, in case of sudden rain.

An evening air service between London and Paris has just been inaugurated.

### Academy Rejects Painting

A painting by Harry Symons, entitled "The Last Supper," and depicting Christ and His apostles in lounge suits, collars and cravats, seated at a modern table, has been rejected by the Royal Academy of Britain.

**A Valentine Pun**

The largest penknives in the world is now shown in London. It was made in 1883, and has 1,831 blades, each of which can be opened. Each blade is a perfect penknife. The knife weighs over three stones. An offer of \$7,500 for it has been refused.

### Best Quality Shaving Brush FREE for POKER HANDS

Shaving is a real pleasure with a fine quality shaving brush like this one... briar set in rubber... a gift you'll surely appreciate and use. Given in exchange for only 5 complete sets of Turret Poker Hands.

One 20c package of Turret Fine Cut will prove the quality and economy of this mellow, cool Virginia cigarette tobacco. You can roll at least 50 cigarettes from one package... and cigarettes of sweet Virginia fragrance and flavour... supremely satisfying.

SAVE THE POKER HANDS

### New Fire Fighting Inventions

One Uses Only Water To Put Out Oil Fires

Some new fire-fighting inventions were demonstrated at a Conference of the Firemen's Divisional Councils in London Fire Brigade, in a lecture before the Royal Society of Arts. One was a method of putting out oil fires with water only. Another was a large-angle apparatus which enables one to extinguish small fires on top of one's automobile or boat, or even on to one's houseboat or cabin or boat and carbon dioxide gas—the gas obtained by purifying and treating the exhaust gases of the internal combustion engine which propels the appliance. The apparatus is driven by compressed water alone and has been evolved during the last year. It has received the approval of the Board of Trade for ship installations and has been fitted in some instances on shore. One for use in ships has been fitted in the hull of a vessel 150 feet long by 150 feet wide, the London post office is now fitting up telephone and telegraph facilities, which, it claims, make London the "switchboard of the world." In the centre of the room is a titanic twelve-ton statue of Hercules to inspire the modern Atlantes in their work.

**Preparing For World Economic Conference**  
Representatives Of Sixty Nations Are Expected To Attend

Some 1,500 delegates representing sixty nations are expected to attend the world economic conference in London in June. When it is expected, the organization committee will summon for June 12. This is the best news London's hotels and shops have had since the world slump. Various legitimate and amateur theatricals are already making arrangements for the conference. The sessions will be held, appropriately enough, in the London Geological Museum. Around a spacious hall 100 feet long by 150 feet wide, the London post office is now fitting up telephone and telegraph facilities, which, it claims, make London the "switchboard of the world." In the centre of the room is a titanic twelve-ton statue of Hercules to inspire the modern Atlantes in their work.

### New Type Of Banana

Trinidad Produces Fruit Immune To Disease

The discovery of a new type of banana at Port of Spain is expected to make economic history in Trinidad.

Thomas Potter, the secretary of the Agricultural Society, told an audience the banana was of the same family as the local West Indies banana and was immune to "Panama disease," but was the same size and color as the Jamaican banana. It promises to meet all requirements of the export trade and is described as the "best of the fruit." A commercial committee recently recommended a grant of \$2,000 to develop banana exports from the colony. The Tropical College is now experimenting to find the best temperature for sea transport of bananas.

### Market Is Improving

Japan Is Buying More Of Canada's Raw Materials

Japan's market for Canadian raw materials is gradually improving, since entry into the country since the war has increased, and its obligations can be paid only in gold, services, or favorable trade balances.

He referred to the administration's policy as one of "reasonable, moderate, decent" tariffs, not "no tariffs, nor even low tariffs."

### Now You Tell One

Tenneesse Men Had Hog Weighing Ton And Half

"Big Bill" king of porkers, is dead. He died by his owner, Walter Chappell, tears in his eyes, cried. Chappell of Marion, Tennessee, is the world's biggest hog. "Big Bill" tipped the scales at 2,350 pounds. Chappell planned to fatten him up to 3,000 pounds and take him to Chicago for the Century of Progress exhibition.

"Big Bill" was willing, but a foreleg broke under the strain of so much poundage and caused paralysis. Chappell, tears in his eyes, cried. Chappell, of Marion, Tennessee, is the world's biggest Polack. China bear chafed when told today the timberman had been nominated to make "Big Bill's" a fine thing for future generations to marvel at.

The oldest pig in the world is in a museum in Stockholm, Sweden. It is believed to be 3,900 years old.

## IN TEARS WITH PAIN OF RHEUMATISM

"For six weeks," a woman writes, "I had rheumatism, mostly in my feet and legs, so bad I could not stand in tears with the pain. Owing to stomach trouble, I could not take any kind of medicine, as it would give me more pain. So a lady said I should try Kruschen Salts. I am very thankful that I did so, as I have felt perfectly restored. I have not been taking anything else, so it must be Kruschen salts that has relieved me."

The Kruschen salts of Kruschen have a direct effect upon the whole system, neutralizing the acid condition which is the recognized cause of rheumatism. They also restore the eliminating organs to proper order, thereby preventing constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

## WORLD HAPPENINGS BRIEFLY TOLD

Twelve feet high and weighing two tons, a statue of Christopher Columbus was shipped from Milan to America as the gift of Italian-Americans to the Chicago World's Fair.

Publication of names of those in receipt of incomes of \$100,000 per year or more will not be permitted, Hon. E. N. Rhodes, Minister of Finance, told the House.

Power to raise by way of a loan an amount not exceeding \$75,000,000 will be sought by Hon. E. N. Rhodes, Minister of Finance, in a resolution of which notice has been given.

During the eight months of the present crop year ending with March, 22,670,175 bushels of Canadian wheat have gone abroad via United States seaports, said a report issued by the Department of Agriculture.

Petitions containing 400,000 names on protest of banning Judge Rutherford's lecture by the Canadian radio broadcasting commission were presented to the House of Commons recently.

Cresting what is believed a record in Canadian flying club circles, Walter Catman has completed tests at Winnipeg for his private pilot's license only 23 days after he took his first instructions. He had completed 10 hours solo flying.

Dr. Kiang Kang-Hu, is now in great danger. It is reported that he has saved my people and I am going home," said Dr. Kiang Kang-Hu, head of the department of Chinese studies at McGill University, in bidding farewell to a group of Canadian friends at Montreal. Dr. Kiang said for China from France.

Bankers in Montreal confirmed Toronto statements that a reduction of one half of one per cent. in the six month bank rate on individual bank loans had been put into effect to a very large extent. Question of applying the reduction is left with the individual banks, it was explained, each bank taking action on individual cases.

### Huge Conversion Loan

Minister Of Finance Asks Authority For \$750,000,000 Issue

A huge refunding and conversion loan, amounting possibly to \$750,000,000, will be required within the next few months, it was decided as a result of a resolution seeking parliamentary authority was given by Hon. E. N. Rhodes, Minister of Finance. The resolution asks authority for an issue of a maximum of \$750,000,000 and it is understood the issue will be for a very large portion of the magnitude.

The rate of interest will depend entirely upon the market at the time of the issue, which will be late in the summer, but the general belief is that the government will seek the lowest possible rate. The general belief is that the issue will be sold to yield slightly more than four per cent.

### Easy for the Maid

Interpreted Quirky Word For Benjamin Franklin

Benjamin Franklin was always very keen about the correct spelling of words and he used to maintain that the best story on old spelling concerned a maid who, while finding Brown at home, told him that she had written your message to her yester. Mrs. Deborah Franklin, so they even could not interpret this, so they appealed for aid to Betty, the chambermaid, who promptly replied: "Yester spells wife, what else can it spell?"

French Indo-China produced more rubber last year than in 1931.

Please that isn't shared with another loses half its power to please,

### Recipes For This Week

(By Betty Barclay)

#### BOILED ORANGE ICING (Sufficient for 1 cake)

1 cup sugar.  
1/2 cup water.  
2 egg yolks.

1 tablespoon orange juice.  
1/2 cup granulated orange rind.

Mix sugar and water well. Cook as syrup to a long thread. Beat yolks well and continue beating while pouring syrup over them. Add juice and rind and heat until of a consistency soft. If necessary thin with orange juice. This is an excellent icing for a sponge or angel cake.

#### MEAT PIES WITH RICE

Four cups cooked rice, 1 onion, 2 cups tomatoes, 1/2 teaspoon salt, 2 teaspoons pepper, 1 tablespoon fat, 1 pound raw meat or left-over meat; mix up seasonings with fat, add onions, and if raw meat, add

and stir until the red color disappears. Add the tomato and seasoning after the onion is browned, and heat through. Green beans are put in layer by layer. Add the rice, meat and gravy, and cover with the raw meat and fat. Bake for half an hour.

#### WORKING ON BIG CATALOGUE

Preparation of the British Museum library catalogue in London, England has been started and will be completed within a year. The cataloguers have not yet completed the letter "A". There are about 4,000,000 books to be listed, and the catalogue will fill 165 volumes. It will be sold at \$2,500.

Illuminated pictures are to be cast on the clouds by electricity at the Chicago exposition.

Brussels, Belgium, will hold an aviation exhibition instead of the usual auto show this year.

## A Forestry Policy

Saskatchewan Taking Steps To Deal With Forest Shortage

Hon. J. F. Bunting, K.C., Chairman of the Saskatchewan Commission on Conservation and Afforestation, addressed the legislature recently, when he made many interesting observations regarding the development of forestry work by the Department of Natural resources. A portion of Mr. Bunting's speech is reproduced as follows:

In the year 1868, the late Alexander Taché, a French-Canadian family man from this Western country said that of section of Saskatchewan, south of a line drawn from the corner of the Manitoba boundary with the International Boundary and Kerrobert, in a direction of West Coast, "There is a desert."

In 1868, Major Emory of the United States Frontier Commission, in a report to the United States Government, "The plains of America west of the One-hundredth Meridian are not fit for agriculture, and agricultural population unless you go far enough south to meet the tropical zone, there is no hope for us."

In the matter of afforestation, the Saskatchewan Commission was formed and at the request of the Saskatchewan Government, three hundred and sixty-five prohibitory laws and two hundred and twenty-eight regulations in the forest code, touch, and which of these was the greatest, it was common to dispute the distinction between ritual and ethical, or positive and negative. The pre-eminence of the positive law is of importance to the positive, and to find the greatest value of the laws in circumscribing Sabbath, Sabbath-breaking, profanity, swearing, playing cards, etc. The opposite tendency, to emphasize the peculiarity of the school of Hillel, which taught that "the love of our neighbor is greater than the love of ourselves" as appears in Mark, bears witness to this side.

Jesus began his answer with a reference to the Great Commandment, is lacking in Matthew's account from Deuteronomy 6:4, which is probably the true one. "Honor thy father and mother" like

was, it is, in opposition to the prevailing habit of viewing duty as constraint, and in opposition to the commandment to honor thy father and mother, and to make to replace these trees and to keep replanting and growing trees, the world over.

During the past two years there has been a remarkable increase of trees for firewood in Manitoba and Saskatchewan. This has grown to such proportions that it is estimated that during the last five years there has been a loss of 100 million cubic feet of wood in the forests of the Western Centres there has been a falling off in the coal used this year, owing to the quantity of wood available.

The sale of coal has increased and in some districts financial year.

This policy, if continued, without replacement of the cut over, will be unable to meet the demand for fuel to be made to replace these trees and to keep replanting and growing trees, the world over.

## SUNDAY SCHOOL LESSON

MAY 21

### JESUS ANSWERS ADVERSARIES

Golden Text: "Never man so spoke." John 7:46.

Lesson: Mark 12:1-4.

Devotional Reading: Psalm 27:1-6.

### Explanations and Comments

The Serbes Question About the Greatest Commandment, verses 28-34.

One of the serbes had listened to the questions of the Pharisees and of the Sadducees and to Jesus' answers. These knew that Jesus had answered these new questions with a question of his own: "What commandment is the first of all?"

According to the serbes, the first of all? According to the commandments of the Old Testament, three hundred and sixty-five prohibitory laws and two hundred and twenty-eight regulations in the forest code, touch, and which of these was the greatest, it was common to dispute the distinction between ritual and ethical, or positive and negative. The pre-eminence of the positive law is of importance to the positive, and to find the greatest value of the laws in circumscribing Sabbath, Sabbath-breaking, profanity, swearing, playing cards, etc. The opposite tendency, to emphasize the peculiarity of the school of Hillel, which taught that "the love of our neighbor is greater than the love of ourselves" as appears in Mark, bears witness to this side.

Jesus began his answer with a reference to the Great Commandment, is lacking in Matthew's account from Deuteronomy 6:4, which is probably the true one. "Honor thy father and mother" like

Why People Watch Market

Increase In Wheat Prices Means Additional Spending Power

There is a definite and practical reason why those interested in the betterment of conditions in Canada are busy watching the wheat markets very closely. Canada has in storage at the present time, some 225,000,000 bushels of wheat, which has yet to find its way to the market. The grain growers have given up their advances on wheat, the price will remain stable, the final price they will obtain depends on the price at which it is finally sold.

In the last few weeks the price of wheat has gone up by over \$2,000,000 with every cent of increase in price, it is little wonder that there are many who are watching the wheat markets with great interest.—Oshawa Times.

**Royal Bargue Suggested For Bridge Openings**

Proposal That Prince of Wales Use Royal Artillery

Three new bridges which have been placed across the upper reaches of the Thames, will be formally opened by the Prince of Wales in the early part of July, according to the Times.

A proposal is under consideration that the Prince shall pass along a stretch of the Thames in the royal barge. The vessel is rarely seen. Some years ago the King and Queen passed in a boat along the river.

The bridge at Hampton Court, which is already in use, is close to the old iron-bridge. The new bridge, designed by Edward Lutyens, is a new bridge in three spans, the arches being reinforced concrete, which are faced with Portland stone and party with brick. The brick towers are 100 feet high, and the gables are 40 feet high.

The bridge at St. Paul's has been there for more than forty years.

Mr. W. G. Scott, supervisor of express for the railway, is still looking for the man who shipped it. Mr. Bennett was traffic superintendent of the Northern Pacific Express when it was shipped from Memphis, N. D., in 1912. He is still waiting for the shippers to claim it. It weighed 600,000 pounds, is "Convector of London," and on the other side of the bridge is "Empress of India." No one knows where it was taken out or how it was hauled to Pembina to be shipped.

—Minneapolis Journal.

## The New Car

Father—"How many miles to a garage?"

Mother—"What color is the upholstery?"

Son—"How fast will she go?"

Daughter—"Has it a nice sounding horn?"

Neighbors—"How can they afford it?"

Alaska hopes to fill in missing links to the road to form a highway direct to the United States.

Rail has not fallen on long stretches of the coast of Chile in nearly thirty years.

Collecting refuse in London last year cost \$500,000.

Swans Donated To Elk Lake Sanctuary

Arching their necks as they glide over the waters of the Elk Lake bird sanctuary, 29 magnificent white swans imported from England are a beautiful sight to those who travel along the lake.

—Daily Mail.

Another discovery in the Hudson Bay region is that

the swans are now permitted to

breed in the sanctuary to 50.

The swans were donated to the park by the Ancient Guilds on the Thames river, known as the Vintners and Dyers' Companies. The King is a

beautiful sight to those who travel along the lake.

—Daily Mail.

Abreton and Dundee, Scotland, will eliminate their slums.

## OPPOSITION BY GERMANY SHOWN AT ARMS PARLEY

Geneva, Switzerland.—Delegates of the "Big Five" and others at a special session again failed to reach an agreement on vital issues and decided to leave the entire question to the steering committee, which will decide the fate of the plan.

The "Big Five," comprised of delegates of Great Britain, France, Italy, Germany and the United States, called the meeting in an attempt to get the conference back on the rails after a nosedive wrought through the continued refusal of Germany to come from its position.

Count Rudolph Nadolny, German delegate, again refused, during informal discussions, to abandon Germany's policy of non-cooperation and not accept some of the proposals in the British disarmament plan. Those referring to conscript armies rather than long-term groups, were particularly controversial.

The atmosphere was pessimistic. The leaders even clashed on the question of procedure to be followed, the count insisting the conference should discuss reduction of war material before again considering the reduction of armed forces.

All the others present insisted on settling the armed forces question first.

It is expected that the German position will be opposed by a majority of the standing committee.

The British delegation stated that the conference would vote to continue its work irrespective of Germany's attitude, and even possibly make a convention without Germany.

Adding to the gloom confronting the conference was the declaration of Foreign Minister Konstantin von Neurath of Germany that whatever reductions are achieved under the British plan, "Germany will be compelled to maintain her armaments and increase her arms."

Baron von Neurath, in the statement in the Journal of the German League of Nations Union, asserted that in his judgment there is no hope for progress in the field of armaments or bombing aircraft.

"That means," he wrote, "that Germany must for her own security develop military and naval aviation."

"We must have a navy which cannot be beaten," the German needs said.

He said the British plan, recently presented by Prime Minister Ramsay MacDonald, failed to grant Germany sufficient recognition as far as arms equality is concerned.

## Russia To Sell Railway

### Announces Intention Of Selling the Chinese Eastern Roads

Moscow, Russia.—Russia told the Chinese Nationalist Government that China had no right in the Chinese Eastern Railways to Manchuria and announced its intention of selling the line to the new state of Manchukuo.

Advising the Nanking regime directly the Peiping-Mukden treatise of 1924, according to the press of the Chinese Eastern, was rejected by Soviet Russia and China were considered void, Foreign Commissar Maxim Litvinov revealed the decision to sell the line to keep peace in the Far East.

## Asks For Arms Concessions

### President Roosevelt Seeking For Conciliatory Attitude From Germany

Washington.—President Roosevelt is seeking to induce Germany to a conciliatory attitude which would possibly definite accomplishments at the Geneva disarmament conference.

The American attitude is that the various nations represented at the Geneva disarmament conference should share a willingness to make reasonable concessions to achieve agreement and that talk of treaty revisions should await a more opportune time.

#### Extend Agreement

Ottawa, Ont.—Without debate the House of Commons passed a bill empowering the governor-in-council to extend indefinitely the application of the trade agreement in existence between Canada and New Zealand since May 24, 1932. The treaty expires May 24, 1933.

#### Activity In Alberta Oil Fields

Calgary, Alberta—Calgary oil men predicted great activity in the Turner Valley oil field this summer now that the oil embargo has been removed drilling restrictions and permitted a greater flow of gas, which will result in a larger naphtha production.

## Condemn H.B. Route

### Senators Urge Curtailment Of Export Duties On Furs

Ottawa, Ont.—Senator Patrick Burns of Calgary added his voice to that of Hon. J. P. B. Casgrain, of Montreal, in condemning the Hudson Bay Company's proposal to support Casgrain's motion urging curtailment of government expenditures on the development of the port of Churchill, Senator Burns and the people of the west have taken a stand years before they got the Hudson Bay Railway, and would have been wiser if they had talked for 50 years more.

Senator Burns, a veteran cattleman and an Arctic pioneer, said he had been to Churchill and was in full agreement with its possibilities. The harbor was good but the land along the railway was not fertile. Settlers would foolish to go there when there was a well-known and safe route to the west.

From Winnipeg to the Rockies the western plains were becoming a cattle-feeding country, Senator Burns went on. Shipments of cattle began in February and ended about July.

Great numbers of cattle were available for the trade because marketing was late in opening. Thus Churchill could not expect to participate to a great extent in the growing live cattle export to the United Kingdom. There was practically no timber in the area and the only hope lay in the discovery of important mineral deposits.

Two large mines had already been developed in the area, said Senator Leonard Stevenson of Winnipeg, coming to the defense of the bay route.

He criticized Senator Casgrain for his adverse comments and affirmed his faith in the enterprise.

In closing the debate on the Senate Committee on Trade and Navigation Bill, Senator Stevenson said Churchill Navigation in Hudson Bay was dangerous, he said, and Churchill harbor was subject to ice blockades.

## May Drop Shipping Bill

### Strong Opposition To Be Offered Would Prolong Session

Ottawa, Ont.—The Senate banking and commerce committee, adopted, word for word, the United States coasting laws. Their effect is identical with the previous drafts.

Under the new amendment, transportation of grain at Buffalo is proposed to be limited to 100 bushels per head of the lake to Buffalo and from Buffalo to Montreal, in a Canadian ship. In the Commons western members of both parties are preparing to offer strong opposition and it is believed that the ministry will drop the measure rather than prolong the session.

## Manitoba Emergency Tax

### City of Winnipeg Refuses To Deduct Two Per Cent Levy From Wages

Winnipeg, Man.—Expressing surprise at the action of city council to impose the two per cent emergency tax levy from city employees' pay envelopes, Premier John Bracken said the move was unconstitutional and would be enjoined.

At a meeting of city council a motion was passed instructing the city treasurer not to make the deduction from salaries of city employees. It also expressed the intention of carrying the fight to the courts, should that be necessary.

## New British Air Chief

### Sir Edward Ellington succeeds Late Sir Geoffrey Salmon

London, Eng.—Air Marshal Sir Edward Leonard Ellington has been appointed chief of the air staff in succession to Sir Geoffrey Salmon, who died April 27.

Since 1931, Sir Edward Ellington had been air member for personnel on the air council and for three years before that was air officer commanding-in-chief of the air defence of Britain.

#### Appointed Registrar

Winnipeg, Man.—Sole nominee for the office of registrar of the University of Manitoba, was elected by a vote of graduates on the board of governors, the Right Rev. S. P. Matheson, for many years chancellor under appointment by the lieutenant-governor-in-council, was declared duly elected by the registrar.

#### Throws Stone At Prince

Manchester, Eng.—A large stone was thrown at Prince George at Edinburgh, with on his way in an automobile to the Matchless Airport. The stone was thrown by a boy and hit one of the mudguards with a crack. The prince saw it coming and dodged it.

## War In South America

### Trouble Between Paraguay and Bolivia Causes Concern In United States

Washington.—Word that Paraguay had declared war on Bolivia caused deep concern in American official circles. The State Department's policy is that Paraguay is a party to the Kellogg-Briand pact prohibiting war as an instrument of national policy.

Bolivia, on the other hand, is not a party to the Kellogg-Briand pact under which most of the nations of the world agreed to settle their disputes by peaceful means.

At the state department, where officials have been making under French pressure to settle the Paraguay-Bolivia dispute in the Chaco territory, considerable anxiety was evident, although no immediate statement was forthcoming.

## Thousands of Books Burned

### Germany Is Purging Her Libraries Of Un-German Influence

Berlin, Germany.—Black listed books from private as well as public libraries were piled high on "Kultur's alibi" throughout Germany for public burnings.

Schoolboys enthusiastically packed final preparations for the huge bonfires for which they were responsible.

Nazi student committees of action squads at top speed for more than a week arranging for the great purging of the libraries of "un-German influences."

All books of a Socialistic, Jewish or Pacifist trend were especially marked for destruction.

## SPRING WHEAT ACREAGES CUT IN CANADA AND U.S.

### Oilwa, Ont.—Substantial reductions in spring wheat acreage and grain production generally were estimated in crop reports for Canada and United States released at Ottawa and Washington.

A Dominion bureau of statistics report said the estimated acreage to be sown to spring wheat in 1930 in Canada from 26,646,000 acres in 1929.

Acres planted were slightly above the acreage needed to keep barley and spring wheat lower.

The Washington report indicated that for the first time this century production in all wheat in the United States will be less than estimated acreage.

Acres planted for oats and barley were slightly above the acreage needed to keep barley and spring wheat lower.

The Washington report indicated that for the first time this century production in all wheat in the United States will be less than estimated acreage.

Acres planted were slightly above the acreage needed to keep barley and spring wheat lower.

## Who is to Blame? IS

(Contributed)

We have been hearing numerous reasons advanced during the last few months as to why so many public and high school pupils failed in the June examinations.

Some persons lay the blame on the Department of Education, others on the examiners, the teachers, the pupils or the school boards of trustees. Has any one thought that at least a part of the fail may lie in the home training?

Judging from personal observation, the pupils who come from homes where proper parental control is maintained, where respect and obedience from others is taught, where industry is insisted on, will reflect the influence of the home life in that of their health, life, and in their work.

Pupils who are allowed and indulged students, encouraged at home to do their best, who realize that time is the most valuable asset at their command almost invariably make good.

Unfortunate pupils do not come from homes where parents are strict, but just the opposite—where parents do not insist on obedience, where children are not given the proper food for the building of sound bodies, where idleness and laziness are rewarded, and where insufficient rest and sleep obtained.

They do not realize that the school exists for their benefit, at a great expense to the parents, and that, in order to get the most out of life they must be prepared by education.

They are not taught respect for, nor obedience to authority, but are encouraged to indulge in unfair and unkind acts against teacher, and in defiance of his authority.

When parents realize that the teacher is not engaged on the approval of the pupils, but to teach them how to do their duty, which he must do in his own individual way, and he had the welfare of the individual pupil at heart, that it is to his interest that they all make satisfactory progress, that discipline must be maintained, the pupils themselves will be more hearty cooperators between the parent and the teacher and less failures to pass prescribed examinations. Surely some of the blame lies in the home.—Far Play.

## Local and General

Mr. R. McNaull of Nobleford, was a guest at the home of Mr. and Mrs. C. Luchia for a few days.
